***Duplicate Claim Warning***

Applicant is advised that should claim 1 be found allowable, claim 5 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

***Claim Rejection under 35 U.S.C. 102(b)***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Vistica et al (WO 91/10726; 7/25/91). Vistica teaches a medium (composition) comprising inosine and proline. See claim 1. In a claim to a composition a statement of intended use has no patentable significance.

***Claim Rejection under 35 U.S.C. 103(a)***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6,7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vistica as applied to claims 1-5 above.

See 35 U.S.C. 102(b). Vistica teaches all that is recited in claims 1-5 except for the composition comprising the instant amounts of ingredients. It would have been obvious to one having ordinary skill in the art to determine the optimum amounts of ingredients through routine experimentation. One would have been motivated to do this in order to make the most effective composition.

***Allowable Subject Matter***

Claim 8 is allowable. The prior art does not teach or suggest the instant method comprising the application of instant amino acids onto the leaves of lawn grass plus the application of inosine to subterranean part(s) of lawn grass.
